

Engineering Consultant

Salary – negotiable

An opportunity has arisen within MGPS Services Ltd who are looking for a technician/engineer to carry out training, surveys and risk assessments on medical gas systems in the UK and overseas.

Applicants should be educated to HND/ Degree level in Electrical/Mechanical or Building Services engineering. You will have a number of years experience working within health care services, be self motivated and work to a high standard. Experience of medical gas systems and a working knowledge of HTM 02 are essential – although training will be given to suitable applicants. Applicants should be eligible for membership to a suitable professional engineering organisation.

You will have good presentation and communication skills, be computer literate and able to produce reports.

To apply, please send CV to Ann Goddard at The Stables, The Kennels, Siston Lane, Siston, Bristol BS16 9LR.
